

STRETCH & FLEX Program

Stretching improves flexibility and mobility.

Stretch Smoothly: Bouncing during a stretch invites muscles to respond by tightening up to protect themselves. Begin slowly and smoothly. Work towards a position that starts to feel tight but never becomes painful.

Pain is Not Good: Feeling pain during a stretch is self-defeating. If you feel pain, you are working against the body's loosening-up mechanism. Always ease into your stretch; to do otherwise is to invite injury.

Staying Loose: As you stretch, it is important to keep your body relaxed. This can be accomplished by keeping your breathing even and consistent.

WARM-UP:

- 1 minute stationary walking.

DYNAMIC WARM-UP:

- (repeat 10 times)

WRISTS:

- Move wrists up and down and rotate.

SHOULDERS:

- Alternate raising each arm overhead. Keep palms facing each other.

SIDE BEND:

- Reach up and over to the right or left, as you are reaching let your heel come off the ground (alternate).

TRUNK TWISTS:

- As you twist: lift heel, and go slowly side to side.

ARM CIRCLES:

- Start with arms raised.
- Slowly rotate in small circles.
- Gradually increase circle size while maintaining control.
- Change direction.

ANKLE CIRCLES:

- Stand on one foot.
- Lift up other foot.
- Rotate foot in small circles.
- Do clockwise and counterclockwise rotations.

Consult your physician before beginning any exercise program, or if you have any questions about your ability to perform any stretch.
